State Board of Education

From: Mindy Martini, Deputy Superintendent
Business and Support Services
Nevada Department of Education

Re: Report to the Interim Finance Committee: Class-Size Reduction (CSR) Variances

Pursuant to Nevada Revised Statutes (NRS) 388.700, the State Board of Education, on a quarterly basis, is required to submit a CSR report to the Interim Finance Committee (IFC) on each variance requested by a school district the preceding quarter. The report must include an identification of the elementary school for which a variance was granted, as well as the specific justification for the variance.

Attached is the report of variances for the second quarter of Fiscal Year (FY) 2016. The report provides a summary of variance requests by school district and specific variance information by school. For each variance request, the following information will be presented for each school:

- Type of CSR Program (see descriptions below).
- Demographic Data: Low Income (percent of student population eligible for free and reduced priced lunch) and ELL (percent of the student population who are English Learners (EL)).
- Achievement Data: Star Rating Pursuant to the Nevada School Performance Framework; and
- Student counts over and under the approved ratios by grade.

CSR PROGRAMS IN NEVADA

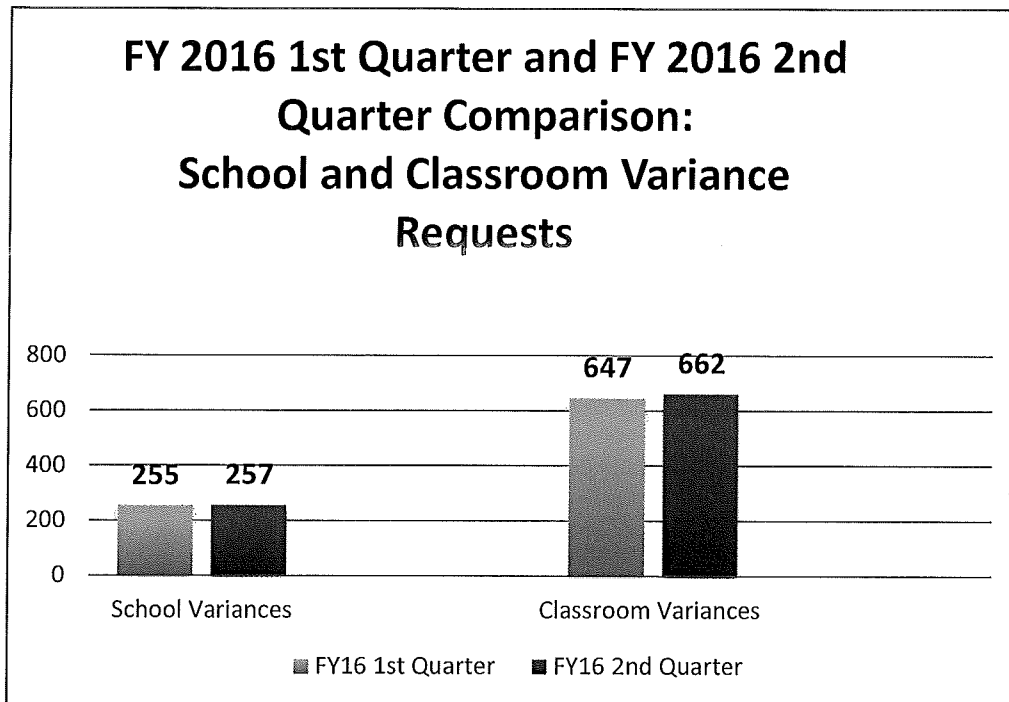

There are two types of CSR programs funded in Nevada:

- ✓ Regular CSR: Pupil-teacher ratio; Kindergarten – 21:1; Grades 1 and 2 – 17:1; and Grade 3 – 20:1. This program is currently funded through Sections 15 and 16 of S.B. 515.

- ✓ Alternative CSR: Kindergarten – 21:1; provides flexibility in implementing pupil-teacher ratios in grades 1 through 6 for school districts other than Clark and Washoe Counties. Grades 1 through 3 – 22:1 and Grades 4 through 6 – 25:1. This program is authorized through NRS 388.720.

SCHOOL DISTRICTS STATEWIDE SUMMARY OF VARIANCES

For the first quarter of FY 2016 the number of schools requesting variances and total classroom variances decreased to 647 variances requested in 255 (71%) of schools in the state. Second quarter FY 2016 had a slight increase in variances requested with 662 in 257 (72%) of schools in the state.

SCHOOL LEVEL ANALYSIS OF VARIANCES

In order to provide a method to analyze variance data by school in a meaningful fashion, the attached variance report may be sorted by school district, demographic data or by the Star Rating. For example, the attached report has been sorted by Star Rating (one star being the lowest performance rating and five being the highest performance rating). The red boxes identify classrooms over the approved ratio; the number inside the shaded box indicates the number of pupils over. The following provides an example of how to read the report; the report is sorted by performance Star Rating:

Example: Hafen Elementary School is the forth school listed in the report. Hafen is a school in Nye County School District (NCSD). This school has a 66.3% free-and-reduced lunch population; and a 7% population as EL; and has a One-Star Rating. You will see there are four red boxes. This school is two over the approved kindergarten ratio of 21:1, six over the approved ratio of 22:1 in grade 2, four over the approved ratio of 22:1 in grade 3 and is seven over the approved ratio of 25:1 in grade 5. Nye is an alternative CSR district, meaning it was approved for pupil-teacher ratios of 21:1 Kindergarten; Grades 1 through 3 – 22:1 and Grades 4 through 6 – 25:1.

Turning to the last page of the report, the same information is presented for Five-Star schools. For example, Blue Diamond Elementary in Clark County School District is the last school listed for the Five-Star schools. This school has a population too small to report its free-and-reduced lunch and English Learner populations; and has a Five-Star Rating. There are no red boxes, meaning class-size ratios have been met. Clark is a regular CSR district, meaning it was approved for pupil-teacher ratios of 21:1 Kindergarten; 17:1 in grades 1 and 2 and 20:1 in grade 3.

School Level Variances - Analysis:

The number of FY 2016 second quarter elementary schools with variances has increased by two schools and classroom variances have gone up by 15 variances since first quarter FY 2016. However, the number of 1 and 2-Star schools with variances has decreased from 33 to 27. Data to determine if the reduction in variance requests will have an impact on student achievement for the 2015-16 school year will not be available until September 2016.

There are six school districts that continue to have variances in 1 and 2 star schools:

School District	1st Quarter Number of 1 and 2 Star Schools with Variances/ Total Eligible Schools	2nd Quarter Number of 1 and 2 Star Schools with Variances/ Total Eligible Schools
Churchill County School District	2/3 (67%)	2/3 (67%)
Clark County School District	13/217 (6%)	10/217 (4%)
Elko County School District		3/12 (25%)
Humboldt County School District	1/8 (13%)	
Nye County School District	6/12 (50%)	6/12 (50%)
Washoe County School District	9/62 (15%)	5/62 (8%)
White Pine County School District	2/4 (50%)	1 /4 (25%)
TOTAL	23/306 (11%)	27/310(8%)

Kindergarten Variance Requests

Pursuant to Section 32 of S.B. 515, the recommended pupil-teacher ratio for kindergarten is 21:1. If classroom ratios exceed 21:1, the superintendent of the school district may approve variances up to 25:1. Kindergarten classrooms may not exceed a 25:1 ratio, except for remote and rural schools with an approved plan of corrective action.

School District Kindergartens: Variance Requests and Plans for Corrective Action: For the second quarter of FY 2016, one additional and one continued remote and rural school has submitted a plan for corrective action to exceed the 25:1 ratio:

- ✓ McGill Elementary in White Pine County School District (27:1 ratio): For the second quarter, the ratio was high due to difficulty in hiring a teacher.
- ✓ Riverview Elementary in Lyon County School District (26:1). The school district indicates that the ratio in kindergarten is over 25:1 due to an unexpected increase in enrollment for sixth grade.

There are five additional schools that are at a 25:1 kindergarten ratio; each has received approval by the school district superintendent for the variances.

- ✓ Bordewich Bray – Carson City School District
- ✓ May Elementary – Clark County School District
- ✓ Minden Elementary – Douglas County School District
- ✓ Zephyr Cove Elementary - Douglas County School District
- ✓ Silver Stage Elementary – Lyon County School District

Charter School Kindergartens: Variance Requests and Plans for Corrective Action: Of 29 charter schools with full-day kindergarten, 14 are over the recommended 21:1 pupil-teacher ratio and have received governing body approval for the variances. Four charter schools are over the 25:1 ratio; these charter schools will not receive funds for 2nd quarter.

2nd Quarter FY16

Charter School	Pupil-Teacher Ratio
Bailey Charter Elementary School	23
Doral Academy Cactus	25
Doral Academy Saddle	25
Doral Academy Fire Mesa	25

Somerset Academy of Las Vegas Losee	25
Somerset Academy of Las Vegas N LV	25
Somerset Academy of Las Vegas SKyPoint	25
Somerset Academy of Las Vegas Stephanie	25

Funding for CSR at the School District and School Levels: For FY 2016, Section 16 of S.B. 515 provides that funding for CSR shall pay the salaries and benefits of not less than 1,950 teachers to meet required ratios. To date, funding for 1,833.75 teachers has been allocated to school districts, which provides sufficient funds for school districts to meet required ratios at a school district level. The remaining units will be allocated to the lowest performing schools with variances.

CONCLUDING REMARKS

The Department continues to be committed to working with the State Board and school districts/charter schools to decrease the number of variance requests, particularly in high need schools. I hope this information is useful to you; if you have any questions, please do not hesitate to contact me.
